

Southeast Alaska Fish Habitat Partnership

The Southeast Alaska Fish Habitat Partnership's vision is to ensure healthy, thriving habitats that support all life stages of Southeast Alaska resident, anadromous, estuarine and marine dependent fishes across their historical range.

WHAT IS A FISH HABITAT PARTNERSHIP?

These Partnerships are a national network of local communities, non-profit organizations, state and federal agencies, and residents working together to support cooperative fish habitat conservation through coordinated strategies and local actions.

The Southeast Alaska Fish Habitat Partnership is the newest 'candidate partnership' in this network and joins similar initiatives underway in the Mat-Su Valley, Kenai Peninsula, and Southwest Alaska.

As a forum for more effective collaboration in support of maintaining and restoring Southeast Alaska's fish habitat, we hope that you will join us.

OUR GOALS

- Conserve, protect, and restore fish habitat
- Facilitate effective coordination and collaboration among our interagency, tribal, and NGO partners
- Identify, prioritize, and implement watershed restoration projects
- Help guide public policy related to aquatic habitat conservation through assessments, training, and research.
- Identify funding sources and partners for projects.
- Host an annual symposium to share information

PARTNERS

- U.S. Fish and Wildlife Service
- Trout Unlimited
- National Marine Fisheries Service
- USFS Tongass National Forest
- Alaska Department of Fish and Game
- Central Council Tlingit & Haida Indian Tribes of Alaska
- Alaska Department of Environmental Conservation
- The Nature Conservancy
- Southeast Alaska Watershed Coalition
